Construction & Engineering  
Mechanical & Process Eng.

### Environment, Health & Safety

Risk Evaluation  
Operational safety  
Environmental Impact

# Expert Witness Delay

LASLETT INTERNATIONAL

Delay Analysis is one of the most frequently required services.

There are several methodologies, and a variety of software, that are used throughout the process of delay analysis.

Our experts have experience in the application of all delay analysis methodologies together with critical path analysis and other forensic practices.

These include but are not limited to:

- Delay Cause and Effect
- Extension of Time (EOT)
- Critical Path Analysis
- Project Planning and Scheduling
- Forensic Analysis

Our delay experts have been instructed in many different and complex dispute cases including high profile international disputes on major projects in many industry sectors.

The industry sectors we are experts in include:

- Oil and Gas
- Petrochemical & Chemical
- Pipelines
- Shipbuilding & Marine
- Power Generation including Renewables – Wind, Wave, Tidal, Solar, Biofuels
- Civil Construction & Engineering
- Mining
- Manufacturing
- Infrastructure & Utilities
- Decommissioning

Appointing the most appropriate delay expert is vital to the success of any dispute case.

We are familiar with working with either the owner or contractor in complex and challenging dispute cases. We have experience in working with legal teams both in the UK and Overseas.

We have been successfully providing expert witness services for over 35 years.

# Expert Witness Quantum

LASLETT INTERNATIONAL

Our Quantum Experts can provide Contract and Cost Analysis for dispute cases.

Quantum experts are key in developing soundly reasoned and evidenced reports that can be essential in delivering the desired financial outcome to a dispute or hearing.

Having the most appropriate quantum expert is vital to the success of any dispute case.

Our quantum experts provide support in the following sectors:

- Contracts
- Cost Engineering
- Work Measurement
- Auditing Project Records
- Forensic Accounting
- Work Valuation

Our quantum experts have an exceptional track record in delivery of a detailed and practical approach in order to achieve the best results, responding to the challenges associated with tracking project processes and large quantities of financial and accounting data.

Our quantum experts have experience in all methods of measurement, how to evaluate delay, disruption, and valuing work under various forms of contract.

Our quantum experts support and align with the delay expert when working on a dispute case.

The industry sectors we are experts in include:

- Oil and Gas
- Petrochemical & Chemical
- Pipelines
- Shipbuilding & Marine
- Power Generation including Renewables – Wind, Wave, Tidal, Solar, Biofuels
- Civil Construction & Engineering
- Mining
- Manufacturing
- Infrastructure & Utilities
- Decommissioning

- Civil and Structural Engineering
- Construction and Engineering
- Mechanical and Electrical Engineering
- Process Engineering
- Project Engineering
- Project Management
- Procurement

Our technical experts cover the following industry sectors:

- Oil and Gas
- Petrochemical & Chemical
- Pipelines
- Shipbuilding & Marine
- Power Generation including Renewables
- Civil Construction & Engineering
- Mining
- Manufacturing
- Infrastructure & Utilities
- Decommissioning

# Expert Witness Environmental, Health & Safety

Our Environmental, Health And Safety Experts have a wealth of experience in respect to oil & gas both on and offshore, power generation, major engineering and infrastructure projects, oil refinery and chemical plant operations, etc.

Our experts are familiar with working with either the owner or contractor in complex and challenging dispute cases. We have experience in working with legal teams both in the UK and Overseas.

Areas of expertise include but are not limited to:

- Risk Assessment & Evaluation
- Security Risk Management
- Audits and Compliance Reports
- HAZOP/HAZID
- Operational Safety and Safety Reviews
- Emergency Response
- Environmental Impact Studies
- Management Reporting

Our delay experts have been instructed in many different and complex dispute cases including high profile international disputes on major projects in many industry sectors.

The industry sectors we are experts in include:

- Oil and Gas
- Petrochemical & Chemical
- Pipelines
- Shipbuilding & Marine
- Power Generation including Renewables – Wind, Wave, Tidal, Solar, Biofuels
- Civil Construction & Engineering
- Mining
- Manufacturing
- Infrastructure & Utilities
- Decommissioning

We have been successfully providing HSE expertise to industry for over 25 years.
